<b>SEN</b>	National Statistical System

The National Statistical Institute (INE) is the central executive body of the National Statistical System (SEN), which has as its objective the rating, calculation, coordination and dissemination of the country's official statistical information.

The National Institute of Statistics is responsible to the Council of Ministers. (in Law No 7/96 of 5 July)

The National Statistical System (SEN) is the organic set made up of the institutions entrusted with the exercise of official statistics activity.

### OFFICIAL STATISTICS ACTIVITY

Official statistics activity means the set of methods, techniques and procedures for the design, collection, processing, analysis and dissemination of official statistics of national interest, in particular, the compilation of censuses, current and prospective surveys, the compilation of national accounts and economic, social and demographic indicators, and the carrying out of studies, analyses and applied research.

### STATISTICAL AUTHORITY

The principle of the statistical authority is the power of the National Statistical Institute, in carrying out statistical activities, to conduct surveys with a response obligation within the time limits set and to take all necessary steps to produce statistics.

### STATISTICAL CONFIDENTIALITY

The principle of statistical secrecy consists of the INE's obligation to protect individual statistical data, relating to natural or legal persons collected for the production of statistics, against any non-statistical use and unauthorized disclosure, with a view to safeguarding the privacy of citizens, preserving competition between economic agents and guarantee the confidence of respondents.

### **Introductory note**

With this publication, the National Statistics Institute (INE), the rector body of the National Statistical System, intends to share complementary information to the Voluntary National Review, on the Progress of the Sustainable Development Goals monitoring in Mozambique.

The publication contains a Statistical Annex, with data for the global indicators of the Sustainable Development Goals and targets, adopted by the Statistical Commission at its 48<sup>th</sup> session in March 2017, by the Economic and Social Council of the United Nations in June 2017 and by the General Assembly in July 2017 and domesticated for the National Framework of Indicators of Mozambique.

The indicators presented in the annex are those for which data is available. This statistical annex is available electronically on the INE website [www.ine.gov.mz](http://www.ine.gov.mz).

The publication results from the possible compilation of information produced and published by the National Statistical System (NSS) bodies, with greater focus on the data available since 2015, although there is some information from statistical operations with reference to periods prior to the adoption of the 2030 Agenda.

The concepts and definitions, computing method and other reference metadata, for each global indicator presented in this document, are available in the SDG Global Indicators Metadata repository at: <https://unstats.un.org/sdgs/metadata/> and at [www.ine.gov.mz](http://www.ine.gov.mz) on the Mozambique Open Data Platform.

This publication discloses the evolution of indicators for each target in the reporting period, covering the 17 Sustainable Development Goals and, where available and relevant, including data disaggregated by gender, age and geographical location at urban, rural, national and provincial level.

This publication contains a total of 61 internationally comparable indicators and 33 national-level indicators, responding to the monitoring of progress of 15 objectives (with the exception of objectives 12 and 15 which at the time of publication of this document did not present indicators with data) and 62 targets defined at global level.

It is INE's expectation that this publication will achieve the proposed objectives of, among others, providing relevant official statistical information to users and creating the possibility of materializing numerous activities included in the national and international socio-economic development plans with greater emphasis on monitoring and assessment of progress in reaching the goals defined in the 2030 Agenda (SDG).

To all users, INE addresses, in advance, its thanks for the helpful contributions and suggestions that may be made to improve the next editions of this publication.

Eliza Mónica Ana Magau

(President of the National Statistics Institute)
